Technology Services

If we build it, they will come...

Through discovery and planning, we develop short and long-term goals as part of a cohesive, integrated marketing strategy. By delivering creative, marketing and technology services under one roof, we have the resources to deliver results unmatched by other companies.

We can scale solutions to meet your needs, and deliver them in phases to avoid cash flow interruption, and concentrate on your bottom line.

We are so confident that we back our designs with a 120 day no-hassle guarantee! **CALL TODAY FOR YOUR FREE CONSULTATION!**

"Tim Shoop was great to work with! Taking on a novice and guiding me through the best way to set up our new website was not an easy task. I knew broadly what I wanted but had no idea how to drill down to the nitty gritty. Thank goodness Tim and his team did and along with a patient web designer, George Scapin, we have a beautiful new website that is easy to navigate yet has all of the information that anyone would need to learn more about Gulf Coast Kid's House. Check out our new site at www.gulfcoastkidshouse.org and you will see the superb work that Digital Boardwalk did!"

-Vickie Horton Executive Director Gulf Coast Kid's House

Creative Services

Beginning with the initial, creative design of your website, we build your presence on the web. Our experienced design team is highly educated in the realm of graphics design and programming. With our combined talents, we can create an online presence that not only looks great, but enforces your brand and identity.

Marketing Services

We provide standard methods of online marketing such as search engine optimization through the use of website code, keywords and linking. We use new cutting-edge methods that supply higher visitor return and retention. Using micro marketing pages, lead generation, and video spokespeople, we build a solid marketing strategy to return visitors to your site, and keep them there. This results in lead generation that is 70% higher than traditional methods!

Technology Services

We purchase your domains, and host your site. Our programmers can develop applications, and integrate them with your site to streamline your operations. You can use our own content management system to keep your site updated, or hire our team to take care of the updates for you. Then, top this off with E-Commerce solutions and our unique video technologies to drive your business.
